VIII.	Looking Ahead	48-52

ABOUT THE ORGANIZATIONS

Social or Human Service agencies make up 52% of the organizations participating in the study. The remaining sectors were represented at a relatively similar rate across the survey sample.

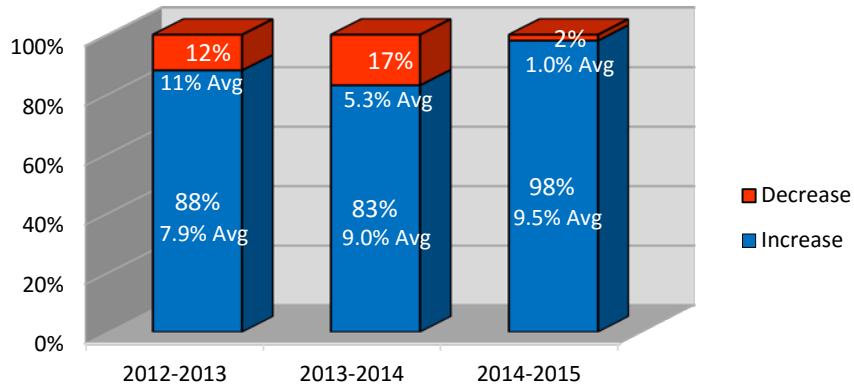

Industry Sectors for All Participating Organizations

All Hands on Deck: 2015 Non-Profit Benchmarking Study

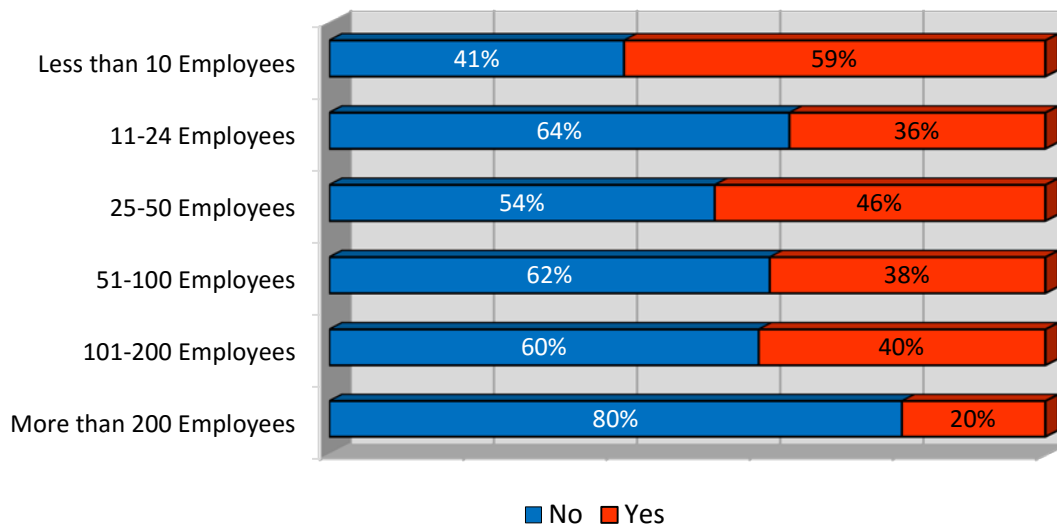

The vast majority of organizations continue to see a rise in healthcare premiums. Over the past two years, non-profit organizations have reported an average annual premium increase between 7-9%, a trend that does not appear to be slowing in 2015.

Gross Premium Changes

Forty-one percent of organizations reported have a succession plan in place while it appears to be more commonly among larger employers. Eighty percent of employers with more than 200 employees reported having a succession plan in place, the highest percentage among all employee size groups.

Current Succession Plan
