# Benefits Information: What Are You Offering Compared to Other Non-Profits

Q. Do you offer a comprehensive benefits package?  
(n=105: Multiple responses allowed)

# Benefits Information: Plans Offered and Funding Strategies

Q. How have your plan costs changed over the past 3 years?  
(n=104: Multiple responses allowed)

Q. Are employee cost increases outpacing wage increases?  
(n=1045)

Q. What is your average annual medical cost increase before plan design changes or cost-shifting?  
(n=106)

# Benefits Information: Have You Considered Self-Funding

The vast majority of organizations (75%) said they have not considered making the transition to a self-funded medical plan. The primary reason for not self-funding were concerns about financial risk (59%) and lack of internal resources or expertise (51%).

*Q. Have you considered making the transition to a self-funded medical plan?*  
(n= 103)

*Q. If no, what are the primary reasons you've chosen not to self-fund?*  
(n= 83: Multiple responses allowed)

# Benefits Information: Who is Paying for the Coverage

Q. If you offer the following benefits, please indicate if they are paid fully by the employer, paid fully by the employee, or the cost is split between the employer and employee.

(n=109: Multiple responses allowed)

# Benefits Information: Deductible and Copays

Participating companies offer diverse employee benefits.

*Q. Please describe your benefit coverage:*

|                                            | PPO       |                    |                    | HDHP      |                    |                    |

# Benefits Information: Spending and Savings Accounts

Participating companies offer diverse employee benefits with half (50%) offering Health Savings Accounts (HSA's) and 41% offering Flexible Spending Accounts (FSA's). About one-third (35%) of the employers fund these accounts.

Q. Which spending accounts do you offer?  
(n=107: Multiple responses allowed)

Q. Does the employer fund any of these accounts?  
(n=95)

Q. Do you use a defined contribution strategy for allocating employer dollars toward benefits?  
(n=97)

Q. If yes, specify amount:

- \$40
- \$50/\$100/\$150
- \$75
- up to \$150 a month
- \$350
- \$400 or \$600/month/employee
- \$450 individual, \$988 family
- \$500 (2 mentions)
- \$500 HSA, \$2000/\$4000 FSA
- \$700
- \$750/\$1200/\$1500
- \$1,000 (2 mentions)
- \$1,200
- \$1,200-\$2,400
- \$1,500 (2 mentions)
- \$3,200
- \$3,850
- Depends on HDHP plan selected
- HSA \$1,000
- HSA only - difference in premium between HSA and PPO

# Market Scorecard

- **Ongoing bull market driven by:**
  - **Resilient economic growth**
  - **AI platform shift / infrastructure spend**
  - **Pro-cyclical fiscal deficit**
  - **Fed in easing mode**
- **2Q market volatility driven by tariffs fears, growth scare**
- **International diversification proving helpful YTD – Largest ROW outperformance vs US since 1993**
- **Long-term interest rates lower YTD, but big picture “higher for longer” (i.e. structurally higher rates than GFC to COVID period) remains in place**

# Macro Backdrop

- *Downside economic risks have increased since March but recession odds still well below 50% for next 12 months*
- *What matters for the economy and markets?*
  - *Fiscal policy – “Business as usual” deficit spending*
  - *Private sector wealth – Positive, but volatile*
  - *Availability and cost of credit – OK*
  - *Jobs/Wages – OK, but stagnant*

# Government Deficit Spending

- ***Proactive fiscal policy and OBBB lock in deficits for as far as the eye can see***

# Wealth Effect

- ***Rising household wealth is a big part of why spending is improving even as income growth has slowed***

## Wage Growth Tracker

three-month moving average of median wage growth, hourly data

## Wealth Effect Guesstimate (Growth boost)

# Credit & Financial Conditions

- *Credit spreads close to narrowest ever*
- *Bank lending standards incrementally tighter YTD, but loan growth steady at 3-4%*
- *As a result, financial conditions most accommodative since last Fall following Fed rate cuts*
- *Good news for economy, but doesn't imply rate cuts are needed*

# Jobs & Wages: “A Curious Kind of Balance”

- *The Good: Not much firing...*

- *The Bad: Not much hiring*

# The Fed

- **Weaker jobs numbers pushed the Fed to cut, but unemployment is not spiking and inflation remains sticky**
- **Bond markets now pricing 2 more cuts this year, 2 more cuts in 2026, “terminal rate” of 3% Fed Funds by YE2026**

\*Current range is 4.00-4.25%

# Economy Appears to be Re-Accelerating

- *GDP contraction in 1Q was a mirage, real private sales were fine*
- *1Q GDP (-0.5%) was artificially weak due to trade and inventories*
- *Revisions to core 2Q growth were significant*
- *Current estimates are for “hot” growth*

# Why? Impact of AI

Source: BEA, Arch Global Economics

# Tech Bubble?

## 1999-2000

- *Capex funded with debt*
- *\$100B/yr on fiber that wasn't needed for a decade*
- *Spend resulted in fiber glut*
- *Market leaders 25-80x P/E*
- *Fed hiking rates*

## 2025

- *Capex funded out of cash flows*
- *Companies embedding AI seeing real savings*
- *Compute and energy constraints (so far)*
- *Market leaders 20-40x P/E*
- *Fed easing rates (for now)*

# Economic Outlook: Base Case Benign, but Tail Risks Exist

- **Positive growth for balance of 2025 and 1H2026**
- **Market is pricing “Goldilocks”:** Fed cuts save the day, avoid a hard landing, inflation risks overstated, growth holds up
- **We see a fairly benign environment: for next 12 months**
  - 4% nominal income growth
  - 4.5% spending (lower savings rate)
  - 1.5% real GDP growth
  - 3% inflation
- **“Too Cold” Risks, implies a recession and stocks down / bonds up:**
  - Labor market deteriorates further as “no hire, no fire” turns to layoffs (watch initial jobless claims data)
  - Corporate earnings slow along with economy (watch 3Q AI/hyperscaler earnings)
- **“Too Hot” Risk, implies stagflation, stocks and bonds both down:**
  - Inflation continues to accelerate, putting the Fed in a box (watch inflation and retail sales data)

Inflation pressures intensifying

Sources: Institute for Supply Management (ISM), US Bureau of Labor Statistics (BLS), Macrobond, Apollo Chief Economist

# Outlook for Non-Profits in 2026

- *A strong economy generally helps non-profits by increasing donations and other revenue streams.*
- *We would expect donations, specifically in the form of stock gifts, to continue to increase in 2026, as we expect stocks to rise in 2026 as they have in 2025 so far.*
- *But a strong economy can potentially lead to competition for labor and potentially increase operational costs, especially if inflation re-accelerates*
- *If inflation does indeed get too hot (not our base case) then this can strain non-profits as they typically lack the ability to easily raise the prices of their services which limits their ability to adjust to the economic environment.*
- *Another area which can be hard to predict is how government grants and support will evolve in 2026.*
